Problem Statement:

Parents are unable to find nannies to watch their kids. Our solution is to provide users with the Granny Gauge (working title), an app where they can easily locate a nanny in their area.

Who is experiencing the problem?

Parents who are unable to find nannies to watch their children.

What is the problem?

Nanny's are not readily available, and parents are finding themselves unable to go out.

Where does the problem present itself?

It is a global problem that every parent faces at some point in time.

Why does it matter?

Parents want to go out and enjoy their life, but are unable because they have to watch their kids.
